RAISING YOUR CHILD IN A DIGITAL WORLD

what modern parents really need to know

The Northern Centre invites you to a parent seminar delivered by Dr Kristy Goodwin, author of 'Raising your Child in the Digital World'.

Dr Kristy Goodwin is a leading children's technology and development expert, public speaker, author and consultant (and a mum!). She helps parents ditch the techno guilt and raise happy, healthy kids who thrive online and offline. Kristy translates the latest research into practical and digestible information, tips, and tricks for parents of primary school aged children; so they can feel confident and assured that they're raising healthy, happy and balanced kids in the digital age.

In this 60-minute seminar (plus Q&A) Dr Kristy Goodwin arms parents with:

- The 7 essential building blocks for thriving in a digital world, so you can have peace of mind that your child's tech habits are healthy and helpful and won't harm your little one.
- Research-based information so you can feel confident about your digital decisions and know how to separate fact from fiction when it comes to kids and technology.
- Practical and simple strategies to use on everyday technologies like TVs, touchscreens devices and video games that are aligned with young children's developmental needs.
