WITH

Dr Kristy
GOODWIN

Dr Kristy Goodwin, one of Australia's leading digital learning and wellness experts, speakers and authors draws on the latest research to explain the professional and legal obligations of educators, carers and health professionals working with children and teens in the digital age. She arms professionals with the latest information about how to safely and professionally navigate the digital world. Dr Kristy explores the current risks facing kids and teens (social media, violent and pornographic content exposure) and what professionals can do to manage these risks when working with kids. She also outlines the legal obligations for professionals when it comes to reporting concerning student behaviour, dealing with cyber-bullying, photographing students and using their own social media. As a former teacher (& mum), Kristy proposes practical and realistic strategies for safe online activity and raises awareness of the current perils and dangers facing young kids, teens and professionals in an online world.

BOOKINGS enquiry@drkristygoodwin.com

Dr Kristy Goodwin is one of Australia's leading digital learning and wellness experts, researchers, speakers and authors. Kristy is a former teacher and parent herself who understands that digital abstinence *isn't* the solution for kids and teens! Kristy translates the research from a range of disciplines into practical, digestible and essential information for educators, carers and health professionals. Kristy explains how technology is impacting and shaping today's childhood and adolescents and what professionals can do to cater and compensate for their plugged-in childhoods. Kristy's previous clients include the NSW Department of Education, National Broadband Network, Apple, Generation Next, Optus and hundreds of public and private schools throughout Australia and Asia.
