

Teaching the iGen

WITH

Dr Kristy
GOODWIN

In this keynote address Dr Kristy Goodwin draws on the latest research from neuroscience, technology and child development disciplines to inform teachers about how today's learners, the iGen, want and expect to learn. In this engaging address, Dr Kristy, a former early childhood and primary teacher and academic from Macquarie University, researcher and author, shares how much time average Australian kids and teens are spending online and how this digital immersion is shaping their childhood and adolescence.

Dr Kristy explains the health, learning and developmental implications of our kids' and teens' plugged-in childhoods and adolescence and equips educators with essential information and practical strategies to accommodate the iGen's learning needs in the classroom. Kristy addresses how screens are impacting students' attention spans, language, fine and gross motor skills, social development and their learning preferences and how teachers can modify their pedagogy and classrooms to accommodate and compensate for these changes. Participants will learn a host of simple strategies to implement in the classroom to engage and support the iGen.

KEYNOTE DETAILS

DURATION This keynote address can be delivered as a 45-90 minute address

SUITABLE FOR Educators of students aged 5-17 years (content of keynote is tailored to suit the needs of the audience). Kristy is an accredited provider with NESA.

PACKAGES Stand-alone keynote address

BOOKING enquiry@drkristygoodwin.com

Dr Kristy Goodwin is one of Australia's leading digital learning and wellness educators, researchers, speakers and authors. Kristy is a former teacher and parent herself who understands that digital abstinence isn't the solution for kids and teens and instead shares practical and realistic advice about how to best navigate kids' digital world! Kristy has spoken at and consulted with hundreds of public and private schools throughout Australia and Asia, is an active researcher in the field, and delivers keynote addresses in Australia and internationally.
